

HILLCREST APARTMENT FIRE

Sunday, 30 September 2012 06:01

The Glasgow Fire Department responded to a report of smoke coming from apartment E 8 at Hillcrest Apartments on Shalimar drive. Upon arrival firefighters forced the door to the apartment and found that two residents were still in the apartment and were removed with the assistance of firefighters to the outside. The fire was contained to the kitchen area and started when some food that was being cooked in a microwave caught on fire and then caught the cabinets on fire. The damage to the apartment was minor and firefighters removed the smoke from the apartment. One person was transported to T. J. Samson Hospital for treatment of smoke inhalation though the injuries appear to be minor. Two other people were treated at the scene. No other injuries were reported.
