

Tonight at about 11:00 p.m., Glasgow Electric Plant Board will commence a big project that will cause widespread interruptions to your cable television and internet services for a few hours.

The work has been scheduled during the late evening tomorrow, March 24 and the early morning hours of Monday, March 25, in the hope that customers will be least inconvenienced. Half of all EPB customers will be affected, anywhere from one hour to about seven hours. This work will impact both cable television and internet services.
