

INTERNET SERVICE COULD BE INTERRUPTED STARTING TUESDAY NIGHT AT 11PM

Sunday, 13 October 2013 05:28

On Tuesday, October 15th at 11pm, the Glasgow Electric Plant Board will begin work on their cable modem termination system, which is the network that delivers cable television and high speed internet service. This project will continue until early Wednesday morning and will interrupt internet service to various areas in the community. This operation will result in faster upload speeds and even fast download speeds.
