

## **FARMERS RECC OUTAGE 2PM UPDATE**

Sunday, 08 December 2013 14:18

---

Due to recent accumulation of ice and sleet, Farmers RECC currently has approximately 250 members without power. Service has been restored to 90% of members who had originally experienced outages. All available crews have been assigned and are working to restore power as safely and quickly as possible. Additional crews have been called in to assist. We anticipate total restoration today.

Primary causes of outage are downed trees due to ice accumulation.

Please report power outages to Farmers RECC at (800) 253-2191. For current outage information check the Farmers RECC Outage Viewer at [www.farmersrecc.com](http://www.farmersrecc.com).

Farmers RECC reminds its members to stay away from fallen power lines. Assume that any line is conducting electricity. During outages, call Farmers RECC ONLY to report downed power lines at (800) 253-2191.

We will issue another update at 4:00PM.
