

The Glasgow Fire Department responded to a fire at the Dana Corporation located on Thursday night. Upon arrival

GFD

units found a dust collector machine, in the heat treat area of the facility, on fire. The fire was contained within the machine by an internal fire sprinkler system, but plant personnel were evacuated as a precaution.

GFD

units removed several air filters that were still blazing and extinguished them outside the factory in a trash bin. No injuries were reported at the scene, and

GFD

was on scene approximately 45 minutes.
