

## UNIDENTIFIED FLYING OBJECT LINKED TO HOME BREAK-INS

Tuesday, 24 December 2013 11:38

---

UFO Observers were calling in from all over the nation last night as an object was tracked moving through the sky at extremely fast speeds. The object seemed to pause very briefly over houses in neighborhoods throughout the country, and the same phenomenon has been reported from other countries worldwide. Eye witness, Randy Brooks, claims the object swooped down low at one point and even knocked his grandmother to the ground.

The phones have rang off the hook today letting us know that following the strange UFO, it seems home break-ins were at an all time high. While nobody has reported anything stolen, it appears quite the opposite occurred as people found gifts, perhaps an apology for the disturbance by the unidentified craft. The object has been described as a red and green metallic sleigh-like object, making a sound resembling that of jingling bells, and led by an intensely bright red light. Wishing you all a Merry Christmas from WCLU.
